

## INTRODUCTION

Any cooler can't operate efficiently without suitable thermal grease! Super high thermal grease TCG002/003 contain metallic silver particles to boost immediate conductivity; operating temperature of  $-50^{\circ}\text{C} \sim 170^{\circ}\text{C}$ ; no bleeding and evaporation concern and durability for 10 years! Just by applying a paint-thin layer of Zaward's Super thermal grease is to fill the invisible gaps in between CPU and coolers to enhance thermal efficiency! A paint-thin layer of Zaward's thermal grease is all you need!
